

FREE BREAKFAST Briefing

7 Trends that will Transform P2P in 2016 Breakfast Seminar

Winning in today's increasingly competitive global economy requires the corporate enterprise to be lean and agile. Procure-to-pay (P2P) is no exception. As a result, more businesses will transform their accounts payable and procurement functions in 2016 from tactical, paper-intensive cost centers into strategic hubs of financial information.

Start your morning off right and join us for a complimentary finance and procurement focused breakfast seminar. Alongside your morning coffee and breakfast, you will learn the 7 trends that will transform P2P this year. The speakers will discuss the top challenges organizations will face, the technologies and best practices that organizations will use, and how these strategies will benefit buyers, suppliers and the C-suite alike.

The information provided during this seminar is critical for developing your automation and process-improvement strategies for 2016. You won't want to risk falling behind your competitors by missing out on this valuable information. Register NOW!

You must be registered in advance to attend.
